

EMPLOYMENT OPPORTUNITY

CNC PROGRAMMER

Canyon Composites, Inc. is a robust aerospace fabrication and assembly company involved in all levels of prime spacecraft and aircraft manufacture. With a strongly supportive clientele such as Boeing Satellite systems, Northrop Grumman, General Dynamics, Ball Aerospace, and NASA we offer full service manufacturing for the most difficult exotic material flight structures.

Position Description:

Canyon Composites, has an immediate opening for a CNC Programmer. The candidate will work with Haas, Mori Seiki and other CNC lathes and mills. The candidate will be responsible for production runs from 1 to 1000 and will need to be able to tolerance parts to ensure quality and accuracy.

This position will be on a daytime shift from 7 AM to 3:30 PM Monday through Friday. Pay will depend on the extent of the candidates experience, knowledge and interview.

Applicants must:

- Have a high-school diploma.
- Have a high degree of general craftsmanship and work ethic.
- Have excellent verbal and written English communication skills.
- Be versed in setup tool design.
- Be able to read and interpret ANSI Y14.5 blueprints and specifications.
- Own setup and inspection tools.
- Provide innovative input on tooling and problem solving.
- Have an ability to foresee technical problems in the manufacturing environment.
- Have expertise with Mastercam.
- Have expertise with 3 and 4 axis lathes and mills.
- Provide a resume.

Recommended Skills:

- 10 years of experience in close tolerance aerospace level machining.
- Familiarity with Haas and Fanuc Controllers.
- Exhibit a broad knowledge and experience of aerospace fabrication, materials, techniques, tools, and innovation.
- Have a stable work history
- Have some knowledge of machining composites.
